-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 9-33 have been renumbered 8-32.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 7-12, 16, 17, 19-21, 23, 24, 26-28, 31, and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,454,027 (cited by applicant).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

Art Unit: 3676

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

US 6,454,027 discloses, with respect to independent claims 1, 7, 16, 19, and 32, a composite construction formed by sintering a combination of granules, the composite construction comprising: a plurality of first material regions 58 comprising a material selected from the group consisting of polycrystalline diamond, polycrystalline cubic boron nitride, and mixtures thereof, the plurality of first regions being defined by a core of the granules; a second material region 62 comprising a material selected from the group consisting of polycrystalline diamond, polycrystalline cubic boron nitride, and mixtures thereof: the plurality of first material regions being dispersed within the second material region, the second material region being defined by a shell that surrounds the core of the granules; wherein the first and second material regions comprise the same material and have different proportions of the same material constituent, and wherein the granules are combined in a random arrangement. The reference further includes a drill bit having an insert comprising the composite construction, as well as a method of making the composite construction. With respect to the depending claims, the reference teaches the limitations as claimed. See the entire document, especially Figs. 1-8.

Allowable Subject Matter

4. Claims 13-15 are allowed.

Art Unit: 3676

5. Claims 22, 25, 29, and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
